# **Introduction**

Built on the Ethereum blockchain, Good Luck Token is a standard ERC-20 virtual token inspired by chance, fortune and superstition. Created to bestow luck to those who hold them, our tokens are digitized good luck charms befitting of the modern age.

Physical coinage, medallions and lucky charms have been coveted among superstitious people and believers in fate as far back as the beginning of time. Completely virtual, our kismet cryptocurrency allows such persons to collect and carry their luck digitally.

LUCK Tokens solve two common problems superstitious people experience:

- The fear of losing or misplacing their lucky coin/charm.
- The fear of forgetting or damaging their lucky coin/charm.

Pack your wallet and prosper. Enjoy the assurance of securely and safely carrying good luck tokens locked within the vault of your Ethereum wallet and digitally attainable 24 hours a day, 7 days a week, 365 days a year.

# **Mission Statement**

Legend has it fortune and favor come to those who believe in the inexplicable powers of karma, chance and serendipity. Rather being something paranormal or metaphysical in nature, luck is speculative thought often represented in the tangible form of lucky tokens, coins, charms or personal curios.

We want those who carry LUCK tokens to feel luckier, happier and more fortuitous in all that they do. Though there will always be skeptics, luck is a novel concept and age-old belief that has been around for centuries. Fate isn't a fluke. You're on the brink of a big break. Take a chance on luck! Fill your Ethereum wallet with lucky tokens that can be stored, traded or gifted.

# **Vision**

We aim to offer a digital version of a physical product familiar to persons around the world. People from all corners of the globe have collected various coins, charms, magical amulets and lucky crystals as tokens of good luck in the past. Designed to eliminate the common frustrations and annoyances of carrying physical objects, Good Luck Token is a completely virtual alternative.

Unlike most other Ethereum tokens, this lucky token does not use any decimals. This was done intentionally so that people could not hold just part of a Good Luck Token. Instead, it was important that people only hold or trade entire tokens. Secondly, when creating LUCK tokens, we also thought it was important to have one fixed amount (888,888,888) be created immediately and that was it - No mining, minting, or burning. LUCK tokens were created to give people the opportunity to hold their very own good luck charm digitally so that they don't have to worry about leaving it at home, losing it or misplacing it. Our goal is to make this virtual lucky charm widely available and easily tradeable for everyone around the world.

# **Tokenomics**

Token Name: Good Luck Token

Token Symbol: LUCK

Token Type: ERC-20

Token Network: Ethereum

Decimals: 0

Max Supply: 888,888,888

Contract Address: 0x3fd9c817e0f1b9653beef770f8cd4251970395f7

# Token Distribution

There are three different ways to get LUCK tokens. First, you can swap Ethereum (ETH) for LUCK tokens directly through our website. A total of 37.5% (333,333,333 LUCK tokens) have been reserved for website swaps and tokens are automatically distributed to your wallet once the transaction has been confirmed. We also reserved 37.5% (333,333,333 LUCK tokens) for exchange listings. Although Good Luck Token is not currently listed on any exchanges, we have this on our road map and once our token has been listed, holders will be able to swap their LUCK tokens on these exchanges. Finally, we have reserved a total of 12.5% (111,111,111 LUCK tokens) for distribution via giveaways and airdrops. These will be tokens people can obtain for free by completing a variety of different tasks. The final 12.5% (111,111,111 LUCK tokens) are reserved for team members and developers.

# **Road Map**

## **1st Quarter 2020**

Token Created, Website Launched and Presale Started

## **2nd Quarter 2020**
